STRENGTH OF MATERIALS

Numbers 1-12, 1970

STRENGTH OF MATERIALS
Numbers 1-12, 1970
(A translation of Problemy Prochnosty)

A

Ababkov, G. V.-115
Ablamskii, V. A.-678
Adamovich, V. K.-121
Afonina, V. M.-648
Akhremenko, V. L.-23
Akimov, L. M.-1108
Amel'yanchik, A. V.-265
Anan'ev, I. V.-1307
Anisimov, Yu. I.-784
Antipov, E. A.-335, 496, 586
Arone, R. G.-742
Atroshchenko, L. V.-601
Averchenko, P. A.-484

B

Babei, Yu. I.-1051
Babenko, A. E.-138, 1186
Baikov, B. A.-1055
Bakshi, O. A.-780, 784, 1072
Balakovskii, O. B.-33
Balina, V. S.-466
Balyberdin, V. S.-414
Balyuk, A. D.-1290
Bannykh, O. A.-344
Barantseva, I. G.-1197
Barats, N. K.-350
Bashkatova, Zh. V.-730
Bashta, O. T.-922, 932
Beloivan, A. F.-370, 391
Belyaev, M. S.-1108
Berezanskii, V. V.-370
Bichutskaya, O. V.-1108
Bobritskaya, S.D.-261, 1141
Bogaishuk, V. I.-293
Boginich, O. E.-399, 837
Bogomolov, S. I.-936
Bogutskii, V. V.-478
Boitko, V.I.-301
Buglov, E. G.-43
Bondarenko, Yu. D.-674
Bondarev, Yu. A.-753
Bulygin, I. P.-682, 986, 1103
Burmistrova, L. N.-183

C

Chaikovskii, B. S.-248, 928, 959, 1322
Chebotarev, O. M.-692
Chechko, V. N.-1266
Cherepanov, G. P.-641
Chernomorchenko, V. I.-422
Chernyak, N. I.-350, 1256
Chernyi, O. V.-397
Chernyshev, V. M.-499, 553
Chizhik, A. A.-723
Chuprina, A. F.-487, 1302

D

Danilenko, L. I.-598
Dan'ko, V. G.-1088
Danyushchenkov, I. A.-1272
Dekhtyar, A. S.-548
Demchishin, A. V.-1132
Denisenko, É. T.-1146
Deryagin, G. A.-308, 619
Dlugach, L. A.-900
Doronin, V. M.-682
Drozdov, N. A.-1055
Dubenets, V. G.-82, 163, 848, 860, 879
Dutsyak, Z. G.-1051
Dvinova, A. M.-892
Dzyuba, V. S.-391

E

Efimov, V. I.-1085
Efremova, G. A.-434
Eliseenko, A. I.-214
Emel'yanov, R. F.-536

F

Fedorov, A. A.-1018
Fedorov, V. A.-214
Fedosov, A. I.-284, 473
Filatov, M. Ya.-43, 227
Filatova, N. A.-1146
Filippov, V. Z.-1015
Finkel', V. M.-214
Fomichev, V. I.-173
Fot, N. A.-456, 609, 1206
Freitag, V. A.-794, 1036
Frolov, K. V.-1311
Frolov, Yu. P.-385

G

Gafarov, R. Kh.-209
Gashchenko, A. G.-391
Geminov, V. N.-230, 532
Gerasenko, I. V.-1326
Getman, A. F.-487, 1227
Getsov, L. B.-1000
Giatsintov, E. V.-315, 1004
Glukharev, K. K.-1311
Gogilashvili, V. N.-947
Gogotsi, G. A.-202, 253, 699

STRENGTH OF MATERIALS

Numbers 1-12, 1970

(A translation of Problemy Prochnosty)

Number 1 January, 1970

	Engl.	Russ.
SCIENTIFIC-TECHNICAL SECTION		
Ductility and Limiting Strength Criteria of Carbon Steel under Low-Temperature Conditions – G. S. Pisarenko, A. A. Lebedev, and V. P. Lamashevskii.	1	3
Statistics of Failure by Unwinding of Oriented Glass – Plastics – S. V. Serensen and V. S. Strelyaev	5	8
Investigation into the Fatigue Life of Turbine Blade Alloys and Structural Elements under Thermal Cycling Conditions – V. T. Troshchenko, B. A. Gryaznov, Yu. M. Shemegan, and E. G. Konoplyannikov	16	19
The State of Stress in a Lamina with a Hole in a Region of Small Elastoplastic Deformation – I. A. Kozlov and V. L. Akhremenko	23	26
Effect of Nonstationary Loading Cycles on the Durability of Thin-Walled Power Components in High-Temperature Creep Conditions – V. D. Kurov and V. D. Tokarev	27	31
Use of Accelerated Tests with Progressive Load for Determination of Statistical Fatigue Characteristics – O. Yu. Kramarenko and O. B. Balakovskii	33	36
Effect of Aging and Cold Working on the Resistance to Plastic Deformation of Structural Steels under Low-Cycle Loading – N. A. Makhutov, A. M. Shcherbak, V. G. Poida, and V. F. Terent'ev	39	42
Investigation of the Fatigue of Steel in the Presence of Biharmonic Loading – E. G. Buglov, É. A. Kolikov, and M. Ya. Filatov	43	46
The Variational Principle and Its Application to Static Problems in Fracture Mechanics – V. Z. Parton	47	50
Problems of Interaction and the Inertial Effect in the Mechanics of Fracture – V. Z. Parton	54	56
Calculation of the Stress Distribution in a Planar Model of a Thread – M. F. Yakovelev . .	62	64
Some Iteration Methods of Solving a Second Boundary-Value Problem for the Equations of the Theory of Elasticity in Terms of Displacements. Communication 1. – I. N. Molchanov	68	69
Some Iteration Methods of Solving a Second Boundary-Value Problem for the Equations of the Theory of Elasticity in Terms of Displacements. Communication 2. – I. N. Molchanov	73	73
Damping of the Bending Vibrations of Previously Extended and Twisted Rods – V. V. Khil'chevskii	79	80
Vibrations of Three-Layer Plates with an Allowance for Energy Dissipation in the Material (One-Dimensional Case) – V. G. Dubenets.	82	83
INDUSTRIAL SECTION		
Resistance and Durability Problems Emerging during the Production and Operation of Small Series Power Machines of Large Resource – I. D. Dorofeev, I. A. Klimenko, and V. I. Nikolaev.	86	86

Experimental Determination of Equivalent Damage Sustained by ÉI437B Alloy at Intermediate Service Durations and Different Stress Levels under Creep Conditions – N. A. Vorob'ev 91 91
Some Questions Related to the Vibration Strength of Aviation Gas-Turbine Motors with Long Operating Times – V. I. Omel'chenko 95 95
Investigation of the Fatigue Strength of Steel DI-22 at Normal and High Temperature – G. K. Vitort, B. A. Gryaznov, S. I. Sklyar, and Yu. M. Shemegan 100 99

CHRONICLES
Resolution of the Scientific and Technical Conference on Strength Criteria and Methods of Accelerated Tests of Materials and Structural Members 103 102

OBITUARY 105 104

Number 2 February, 1970

SCIENTIFIC-TECHNICAL SECTION
Vibration Strain on Aircraft Engine Hooped Turbine Blades – L. N. Rzhavin, N. I. Opalikhin, and V. V. Matveev 107 3
Experimental Verification of Fatigue Strength Criteria under Biaxial Tension – I. N. Shkanov 112 8
Fatigue Crack Propagation Rate – V. I. Shabalin and G. V. Ababkov 115 11
Strength Dependence of the Ductility of Heat-Resisting Materials – V. K. Adamovich . . . 121 18
Geometric Treatment of a Generalized Criterion of Strength – A. A. Lebedev 124 21
Mechanical Properties of Polyvinyl Chloride Films in Biaxial Tension. Communication 1 – S. S. Veremchuk and É. S. Umanskii 128 24
Plastic Strain Buildup during Repeated Thermal Load Applications Causing Alternating Flow – N. S. Mozharovskii 135 32
Low-Cycle Fatigue of ÉI612 and ÉI437B Heat-Resisting Materials at Normal and Elevated Temperatures – A. E. Babenko 138 35
Low-Temperature Mechanical Properties of New Titanium Alloys – P. F. Koshelev, V. S. Mikheev, and P. N. Nikitin 143 40
Quasistatic Temperature Problem for a Plane with a Notch – B. A. Kudryavtsev and V. Z. Parton 149 46
Complex Bending of a Plate Subjected to Normal Stress and to Compression – I. N. Molchanov and G. I. Viznyuk 156 52
Energy Dissipation during Vibration of Multilayer Plates – V. G. Dubenets 163 58

MANUFACTURING SECTION
Accelerated Equivalent Tests for the Serviceability of Welded Joints – B. F. Shopp, N. S. Kochukov, and M. A. Porter 169 63
A Gas Dynamic Rig for Strength Tests on Turbine Disks under Conditions of Unsteady Loads – V. A. Sekistov, I. A. Kozlov, and V. I. Fomichev 173 68
Experimental Investigations of the Thermostability of Nozzle Blades of Transport Gas Turbine Plants – A. A. Rabinovich 179 74
Fatigue Testing of Boiler Steels under an Asymmetric Stress Range – I. V. Kudryavtsev, L. N. Burmistrova, A. S. Maminov, and I. N. Shkanov 183 77
Methods for Determining Durability of Lenticular Compensators – A. I. Kartsev 187 81
Nomograms for the Determination of Thermoelastic Stresses in Plates. Communication 1 – L. V. Kravchuk 193 87
Nomograms for the Determination of Thermoelastic Stresses in Plates. Communication 2 – L. V. Kravchuk 198 92

Method for the Investigation of Brittle Materials Using Tubular Specimens – G. A. Gogotsi 202 96

CHRONICLES

The State Prize of the Ukrainian SSR in Science and Technology Has Been Awarded to a Group of Scientists of the Institute of Strength of Materials, Academy of Sciences of the Ukrainian SSR – R. I. Kuriat. 207 101

Number 3 March, 1970

SCIENTIFIC-TECHNICAL SECTION

Structural Deformations of Metals – R. Kh. Gafarov and S. D. Volkov..... 209 3

Retardation of Fast Cracks by Some Structural Defects – V. M. Finkel', I. N. Voronov, A. M. Savel'ev, A. I. Eliseenko, V. A. Fedorov, and A. S. Khmelevskii..... 214 8

A Technique for Determining Fracture-Toughness (K_{1C}) from Results of Fatigue Tests on Specimens – V. S. Ivanova and V. G. Kudryashov..... 224 17

The Service Lives of Materials under Stress Concentration with Biharmonic Loading – M. Ya. Filatov..... 227 20

Some Methods of Interpreting the Characteristics of High-Temperature Strength – V. N. Geminov 230 24

Creep and Long-Term Strength of Niobium Alloy VN-2 at High Temperatures – V. V. Krivenyuk and I. V. Makovetskii 235 29

Theoretical Study of the Laws Governing the Magnetoelastic Damping of Vibrations in Ferromagnetics. Communication 1. Small Loads and Magnetic Fields – I. B. Kekalo and V. L. Stolyarov 239 33

The Damping of Independent Superposed Flexural and Torsional Vibrations of a Rod – V. V. Khil'chevskii 245 39

Determination of the Decrement of Oscillations with Automatic Counting of the Number of Cycles – V. V. Matveev and B. S. Chaikovskii..... 248 42

Investigation of Fracture in Aluminum Silicate Refractories Containing Boron Nitride – G. A. Gogotsi, R. I. Kuriat, B. I. Terekhovskii, and S. G. Tresvyatskii..... 253 47

Mechanical Properties of Polyvinyl Chloride Films in Biaxial Tension. Communication 2 – S. S. Veremchuk and É. S. Umanskii..... 257 51

Strength Calculations for Solids of Revolution. Axially Symmetric Thermoelastic Problem for the Case in Which the Physical Characteristics of the Material Vary Along the Axis of Revolution – S. D. Bobritskaya, A. L. Kvitka, and V. P. Stukalov.... 261 55

Computer Solution of Two-Dimensional Elastoplastic and Creep Deformation Problems – A. V. Amel'yanchik, Yu. S. Gutorova, and V. T. Lapteva..... 265 58

Upper Limit of Supporting Power of Shells of Revolution under the Action of an Inside Gas Flow – M. Sh. Varvak..... 270 63

MANUFACTURING SECTION

Some Problems of the Strength and Durability of Turboprop Engines of High Reliability – V. I. Omel'chenko..... 275 68

Fatigue Strength of 16GNM Steel as a Function of Heat-Treatment Conditions – N. E. Naumchenkov, V. G. Mikhaleva, and D. L. Mikhailov..... 281 75

Low-Cycle Fatigue of 15Kh1M1F and ÉI756 Steels – A. I. Fedosov and L. N. Minkin..... 284 78

Increasing the Fatigue Strength of Parts by Axial Compressive Prestressing – G. P. Sazhina..... 287 81

BRIEF COMMUNICATIONS

Temperature Characteristics of Resistance Wire Strain Gauges under Rapid Temperature-Variation Conditions – Yu. I. Likhachev and D. T. Shakhmatov 289 83

Some Problems in Low Temperature Strain Gauge Measurements – V. I. Bogaishuk, I. A. Kozlov, and S. I. Likhatskii 293 86

An Apparatus for Measuring Cyclic Plastic Deformation at High Temperatures – L. A. Khamaza 296 89

A Dual Model of a Deforming Solid – V. A. Kuz'menko	1009	43
A Variational-Difference Method for Solving the Axisymmetric Problem of Elasticity Theory in Terms of Stress Functions – A. L. Kvitka and V. Z. Filippov	1015	49
Engineering Method for Calculating a Cylindrical Welded Roller with Internal Rigid Ribs – A. A. Fedorov	1018	52
Determining the Stress–Strain State of a Circular Plate Reinforced with Radial Ribs – É. S. Umanskii and G. L. Kalikhman	1023	57
The Problem of a Single (Generalized) Curve for Strain Hardening – V. A. Kuz'menko	1031	64
The State of Stress of an Elastically Deformed Helical Heat Exchanger with a Rigid Core and Flat Tubular Grids – O. S. Suvorova and V. A. Freitag	1036	69
INDUSTRIAL SECTION		
Equivalent Testing of Gas-Turbine Engines – N. D. Kuznetsov	1042	74
Apparatus for Testing Turbine Blades in Gas Flow for Mechanical and Thermal Fatigue – A. I. Petrenko and G. N. Tret'yachenko	1046	78
Influence of the Preparation Technique of a Stress Raiser on the Mechanical Characteristics of Specimens in High-Speed Tensile Tests under Low-Temperature Conditions – S. Ya. Yarema, Z. G. Dutsyak, A. M. Manyuk, and Yu. I. Babei	1051	84
Study of Breakdown Resistance of Machine Components at Low Temperatures – N. A. Drozdov, B. A. Baikov, and V. P. Tibanov	1055	88
Method of Assessing Thermal Fatigue in Welded Joints of Pipelines in the Complex Stressed State – G. A. Stepanov, B. A. Kuranov, A. I. Konovalova, and É. A. Kivi	1061	94
Study of the Toughness of Several Steels Used for Pipes with Increased Cold Stability – L. I. Guzevataya and B. P. Kolesnik	1065	98
Chamber and Mechanical Tensometers for Low-Temperature Testing of Tubular Specimens – M. L. Gorb and A. A. Ostrovskii	1068	101
BRIEF COMMUNICATIONS		
Effect of Mechanical Nonuniformity of Welded Joints on Their Resistance to Brittle Fracture under Low-Temperature Conditions – O. A. Bakshi, A. G. Kukin, and A. N. Monoshkov	1072	106
The Relation between Mechanical Properties and Structure of Aluminum and Magnesium Cast Alloys at Low Temperatures – R. I. Il'ina, N. G. Sidorov, B. S. Morozov, M. F. Nikitina, and P. F. Koshelev	1075	108
Low-Temperature Characteristics of Austenitic Steels – K. A. Yushchenko, V. I. Startsev, V. Ya. Il'ichev, G. G. Mon'ko, L. A. Livshits, L. I. Kaplan, G. A. Stepanov, and B. V. Grudzinskii	1079	113
Influence of β-Stabilizers on the Strength and Plasticity of Titanium at Low Temperatures – V. S. Mikheev, P. F. Koshelev, P. N. Nikitin, and and G. D. Shnyrev	1082	115

Engl./Russ.

Effect of Refining with Synthetic Slag on the Fracture Toughness of Steel 50KhFA – V. I. Efimov, V. M. Semenov, É. I. Sharipov, and S. M. Serebrin 1085 118
The Basic Requirements for Constructional Materials for Turbogenerator Rotors with Superconductor Excitation Windings – V. G. Dan'ko, V. S. Kil'dishev, B. L. Konovalov, and L. Ya. Stanislavskii 1088 120

CHRONICLES
Increasing the Strength and Life of Machine Parts by Surface Plastic Deformation. The All-Union Scientific and Technical Conference (February 25-28, 1970) – L. A. Krongauz 1091 122

Number 11 November, 1970

Georgii Stepanovich Pisarenko (on his 60th Birthday) 1093 3

SCIENTIFIC-TECHNICAL SECTION
Physical Theory of the Dynamic Yield Point of Crystalline Materials – G. S. Pisarenko and A. Ya. Krasovskii 1096 6
Reliability of the Extrapolation Method of Assessing the Characteristics of Rupture Strength from the Results of Mass Tests on Commercial Metal – I. P. Bulygin, N. I. Parfenova, L. N. Timofeeva, I. I. Trunin, and G. A. Shaban 1103 14
Kinetics of Fatigue Failure in Heat-Resistant Alloys – N. I. Kononchuk, L. M. Akimov, B. N. Vasil'ev, Yu. A. Lapitskii, M. S. Belyaev, O. V. Bichutskaya, A. A. Kopylov, and V. A. Tikhomirova 1108 19
Effect of Load Asymmetry on Cumulative Damage in Programmed Tests for the Fatigue of Steel Specimens – V. É. Pavlovskii 1114 24
Investigation of Fatigue and Vibration Creep of the ÉI826 Alloy with High-Frequency Loading – I. A. Troyan and A. A. Ivanov 1117 27
Deformation and Rupture of Materials under Thermal Cycling – N. S. Mozharovskii ... 1122 31
Temperature Dependence of the Stress State of Solids with Foreign Inclusions and Thin Coatings – Ya. S. Podstrigach and P. R. Shevchuk 1128 37
Adhesive Strength of Coatings Obtained by Condensation from Vapor Phase under Vacuum – B. A. Lyashenko, V. I. Malyi, V. I. Zelenin, V. V. Rishin, and A. V. Demchishin 1132 41
Spatial Deformation of Massive Nonuniform Solids of Revolution. Part I – S. D. Bobritskaya and A. L. Kvitka 1136 45
Spatial Deformation of Massive Nonuniform Solids of Revolution. Part II – S. D. Bobritskaya and A. L. Kvitka 1141 49
Some Principles of the Deformation of Copper-Containing Al_2O_3 Inclusions – É. T. Denisenko, A. G. Voinitskii, A. D. Kostenko, A. P. Polushko, and N. A. Filatova 1146 54
The Characteristics of Stress Relaxation Obtained by Various Methods – V. V. Osasyuk . 1150 58
The Methods of Finite Elements Applied to an Axially Symmetrical Problem in the Theory of Elasticity – A. L. Kvitka and P. P. Voroshko 1154 61
Constructional Hysteresis in the Herringbone Scarf Joints of Turbine Vanes with Split Shafts – M. S. Kovalev and V. V. Matveev 1161 68
Study of Short Term Creep in Fast Air Flows, Allowing for the Variable Loads Arising from Vibrations – Yu. G. Veksler, V. G. Sorokin, and S. Ya. Paleeva 1168 74
Rigid-Plastic Performance of Shells and Plates Made from a Material with Differing Hardening Moduli – M. S. Mikhalishin and O. N. Shablii 1172 78
Creep and Stress-Rupture Strength of Molybdenum at High Temperatures – E. E. Zelenyuk and V. V. Krivenyuk 1181 86

Engl./Russ.

A Physical Analogy Permitting Definition of the Critical State of a Material during Low Cycle Fatigue – A. E. Babenko 1186 91

MANUFACTURING SECTION

Hydraulic Loading System for the Mechanical Testing of Materials in Atomic Reactor Conditions – D. V. Polevoi, Yu. D. Skripnik, B. K. Lukashev, and O. N. Yudin 1188 93

Apparatus for Investigating Acoustical Fatigue of Materials and Structural Elements – Yu. A. Kashtalyan and L. E. Matokhnyuk 1192 98

Thermal Shock Resistance of Titanium Carbide – I. G. Barantseva, D. M. Karpinos, Yu. L. Pilipovskii, I. K. Senchenkov, and Yu. M. Shamatov 1197 103

Choice of a Rational Method of Vibrotumbling for Strengthening Parts of VT8 Titanium Alloy – E. Ya. Korenevskii and V. K. Yatsenko 1201 106

BRIEF COMMUNICATIONS

Initiation of a Plane Detonation Wave by an Exploding Foil – N. A. Fot 1206 111

Time Inversion of the Increase of Long-Time Strength of Steel 1Kh18N9T – E. M. Lyutyi and G. G. Maksimovich 1209 113

New Method of Determining the Decrement of Oscillations by Means of an Optico-Electrical System – R. K. Ivashchenko and N. L. Pozen 1212 115

Number 12 December, 1970

SCIENTIFIC-TECHNICAL SECTION

The Problem of Rupture in the Physics of Strength – V. L. Indenbom and A. N. Orlov..... 1215 3

Studies of the Bearing Capacity of Samples in Inhomogeneous Stress States during Cyclic Elastoplastic Deformation – V. T. Troshchenko, A. F. Getman, and L. A. Khamaza.. 1227 14

Modeling the Long-Time Failure of Structures – E. A. Khein 1233 20

Resistance of a Low-Carbon Steel Weld to Low-Cycle Failure as a Function of the Properties of Individual Zones – S. V. Serensen and N. A. Makhutov 1239 25

A Model of Composite Failure during Short-Term Creep – A. A. Khvostunkov 1248 34

Mechanical Properties and Structure of Stainless Maraging Steel in the Strengthened Condition – S. B. Nizhnik, V. M. Pelepelin, G. I. Usikova, and N. I. Chernyak 1256 41

Features of the Mechanism for the Plastic Deformation of Niobium – Yu. V. Mil'man, V. I. Trefilov, and A. A. Udovenko..... 1260 45

A Method of Cyclic Elastic–Plastic Torsion Testing of Refractory Materials at Normal and High Temperatures – Yu. V. Miloserdin, A. A. Kul'bakh, V. N. Chechko, and B. D. Semenov..... 1266 51

The Influence of Structure and Test Conditions on the Mechanical Properties of Low Alloy Molybdenum – I. A. Danyushchenkov, R. K. Ivashchenko, Yu. V. Mil'man, V. I. Trefilov, and A. I. Yakushina 1272 58

A Study of the Mechanical Properties of Hot Pressed Pseudoalloys of Tungsten–Copper – D. M. Karpinos, A. A. Kravchenko, Yu. L. Pilipovskii, V. G. Tkachenko, Yu. M. Shamatov, and V. K. Kharchenko..... 1278 64

Effect of Technological Factors on the Mechanical Properties of Molybdenum Alloys at Low Temperatures – N. V. Novikov, A. F. Voitenko, A. G. Voinitskii, E. S. Ovsepyan, and Z. P. Nekrasova 1283 69

Calculation of the Strength of Circular and Annular Slabs Reinforced by Radial Ribs – S. S. Oleshev 1286 72

Determination of the Damping Properties of Systems with Amplitude-Dependent Resistance. Communication 2 – V. V. Matveev and A. D. Balyuk..... 1290 75

Evaluation of the Effect of Constraint of Warping of Cross Sections on the Parameters of Torsional Vibrations of Turbine Blades – L. D. Magomaev 1294 79
Experimental Determination of the Damage Characteristics of Heat-Resistance Alloys on Thermal Cycling – V. N. Kiselevskii and A. F. Chuprina 1302 86
Harm Due to Friction in Shock Absorbers of the Impact Type – I. V. Anan'ev and N. M. Kolbin 1307 91
Method for Treating Friction Forces – K. K. Glukharev and K. V. Frolov 1311 95
Quenching of Surface Oscillations of Liquids in Vessels by a Viscous Liquid – V. S. Gontkevich and Zh. V. Shlyakhova 1318 102

MANUFACTURING SECTION
Damping Capacity of the Hinged Locking Joint of Turbo-Machine Compressor Blades – V. V. Matveev, B. S. Chaikovskii, and L. N. Rzhavin 1322 106
VRD-1500 Stand for Investigating the Strength of Full-Size Turbine Wheels – V. P. Rabinovich, M. G. Kabelevskii, V. S. Romanov, and I. V. Gerasenko 1326 110
